Malaysian Journal of Sustainable Agricultural (MJSA)

Editorial

Malaysian Journal of Sustainable Agricultural (MJSA) is a cross-disciplinary, peer-reviewed journal dedicated to advancing the understanding of sustainability in agricultural and food systems. MJSA publishes papers concerned with the advance of agriculture and the use of land resources throughout the world. MJSA publishes both theoretical developments and critical appraisals of new evidence on what is not sustainable about current or past agricultural and food systems, as well as on transitions towards agricultural and rural sustainability at farm, community, regional, national and international levels, and through food supply chains. It is committed to clear and consistent use of language and logic, and the use of appropriate evidence to substantiate empirical statements. It publishes original scientific work related to strategic and applied studies in all aspects of agricultural science and exploited species, as well as reviews of scientific topics of current agricultural relevance.
